

Who am I? What's out there for me?

This mini project is focused on self-exploration and early-stage career exploration.

1) Create a multi-media project that illustrates & celebrates your personal strengths (e.g., power point, poster, t-shirt design, book, flyer, collage, etc.)

Include the following components into your design:

Your interests;

- *What do I enjoy learning about/doing/thinking about?*

Aptitudes;

- *What am I good at?*

Values;

- *What is important to me?*

2) You are also required to research about the world of work and the concept of careers and respond to the following questions;

- *What kinds of jobs do you already know about?*
- *What do the people that you know think about work?*
- *What are reasons for people to work?*

Please use the following website for ideas and inspiration
